

Luke Belinc

As a software engineer and full stack web developer, I am experienced in contributing to team success through the art of software development and dedication to my craft. Rooted in a passion for learning, I have built a strong skill set which includes 5+ years' experience in applying object-oriented and functional programming techniques.

Experience

Associate Software Engineer

Verint Systems
02/2022-08/2022

Designed new and maintained existing internal software tools
Automated workflows to create efficiency of scale
Provided continuous QoL updates to legacy software/systems
Built and deployed single page web applications via AWS EC2
Provided necessary CLI training to my team
Coordinated multiple projects from initial planning through deployment
Implemented Agile style software development
Doubled annual 2022 release targets by August 2022

Systems Programmer

WSU-Huang Lab
03/2020-10/2020

Built software extensions for the GEOS-Chem and WRF-Chem modeling systems
Wrote scripts to interpret and generate maps from atmospheric data models
Automated software execution using Bash, cron, and Slurm via WSU's HPC
Implemented GNU Make to automate software builds
Provided CLI training to 3 team members

Skill Set

Languages C, C++, C#, Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, Go, Bash, Haskell, CommonLisp, FORTRAN, Ruby

Frameworks/Libraries Angular, React, Express, Jasmine, POSIX, pandas, Tkinter, NumPy, NLTK, Qt, .NET, ASP.NET, jQuery, Rails

Tools Unix shells (zsh, sh, Bash), GNU coreutils, Vim, Slurm, cron, PowerShell, Git, Node.js, \LaTeX , AWS (S3, EC2, Lambda), Database Management Systems (PostgreSQL, MySQL, Oracle Database), Jira, Confluence

Methodologies Agile, CI/CD, Behavior- and Test-driven development

Projects/Hackathons

Advent of Code Various code challenges completed using Haskell, C++, and Python

DHack Designed health monitoring app using AWS Lambda, JavaScript and React Native. Won 2nd place overall and 1st place for the FitBit challenge.

MHacks 8 Designed set of dev tools for remote maintenance of GM Console software. Used C, JavaScript, and Wayland to manipulate system and interact with screen remotely.

Chinese Character Dictionary Designed a simple character meaning and stroke order dictionary and thesaurus using Python, PostgreSQL, and Qt

Mock Terminal POSIX shell built in C

Education

Wayne State University
B.S. in Computer Science
Detroit, MI 2016-2021
